About us

Your front door is a key element of your house facade. Every day you see, touch and use it. Consequently, your door should complement the facade, be safe and secure whilst providing the very best insulation from the elements. High tech. finishes and the very best accessories should ensure maintenance free use.

“Ryterna” offers a wide range of made-to-measure front doors in numerous design choices including the possibility to create your individual / bespoke design. The latest technologies combined with the perfect design features ensure an outstanding appearance and performance.

“Ryterna Entry” is a part of the “Ryterna Group” who have been manufacturing doors since 1993. With authorised dealers all over Europe and our own transport fleet we can provide the shortest possible lead times. “Ryterna” entrance doors are manufactured in a new efficient factory located in Kaunas, Lithuania. Sustainability in manufacture combined with the thermal performance of our products is central to our growth philosophy. We constantly seek for morally responsible and environmentally cleaner ways to improve in all areas of business.

Door leaf structure

- 1 Polyurethane foam
- 2 Cold rolled steel
- 3 Hot dip galvanisation
- 4 Chemical treatment
- 5 Powder coated

Door sealing

Triple rubber sealing contour provides perfect insulation. D-shape silicone rubber is not ageing or shrinking therefore door insulation does not change during a lifetime.

Hinges

Hinges are strong enough to support doors weighing up to 120 kg weight. Allow door to open up 180°. Hinge diameter 18 mm.

Adjustable in three directions:

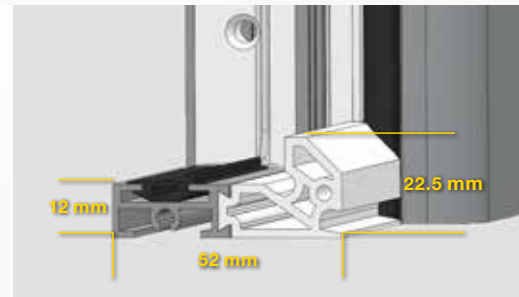

- Vertically +/- 3 mm;
- Horizontally +/- 3 mm;
- Sealing pressure +/- 1.0 mm.

Threshold

Heavy-duty durable aluminium and PVC composite threshold profile perfectly seals bottom of the door protecting your home from drafts, moisture, dust and insects.

Dimensions

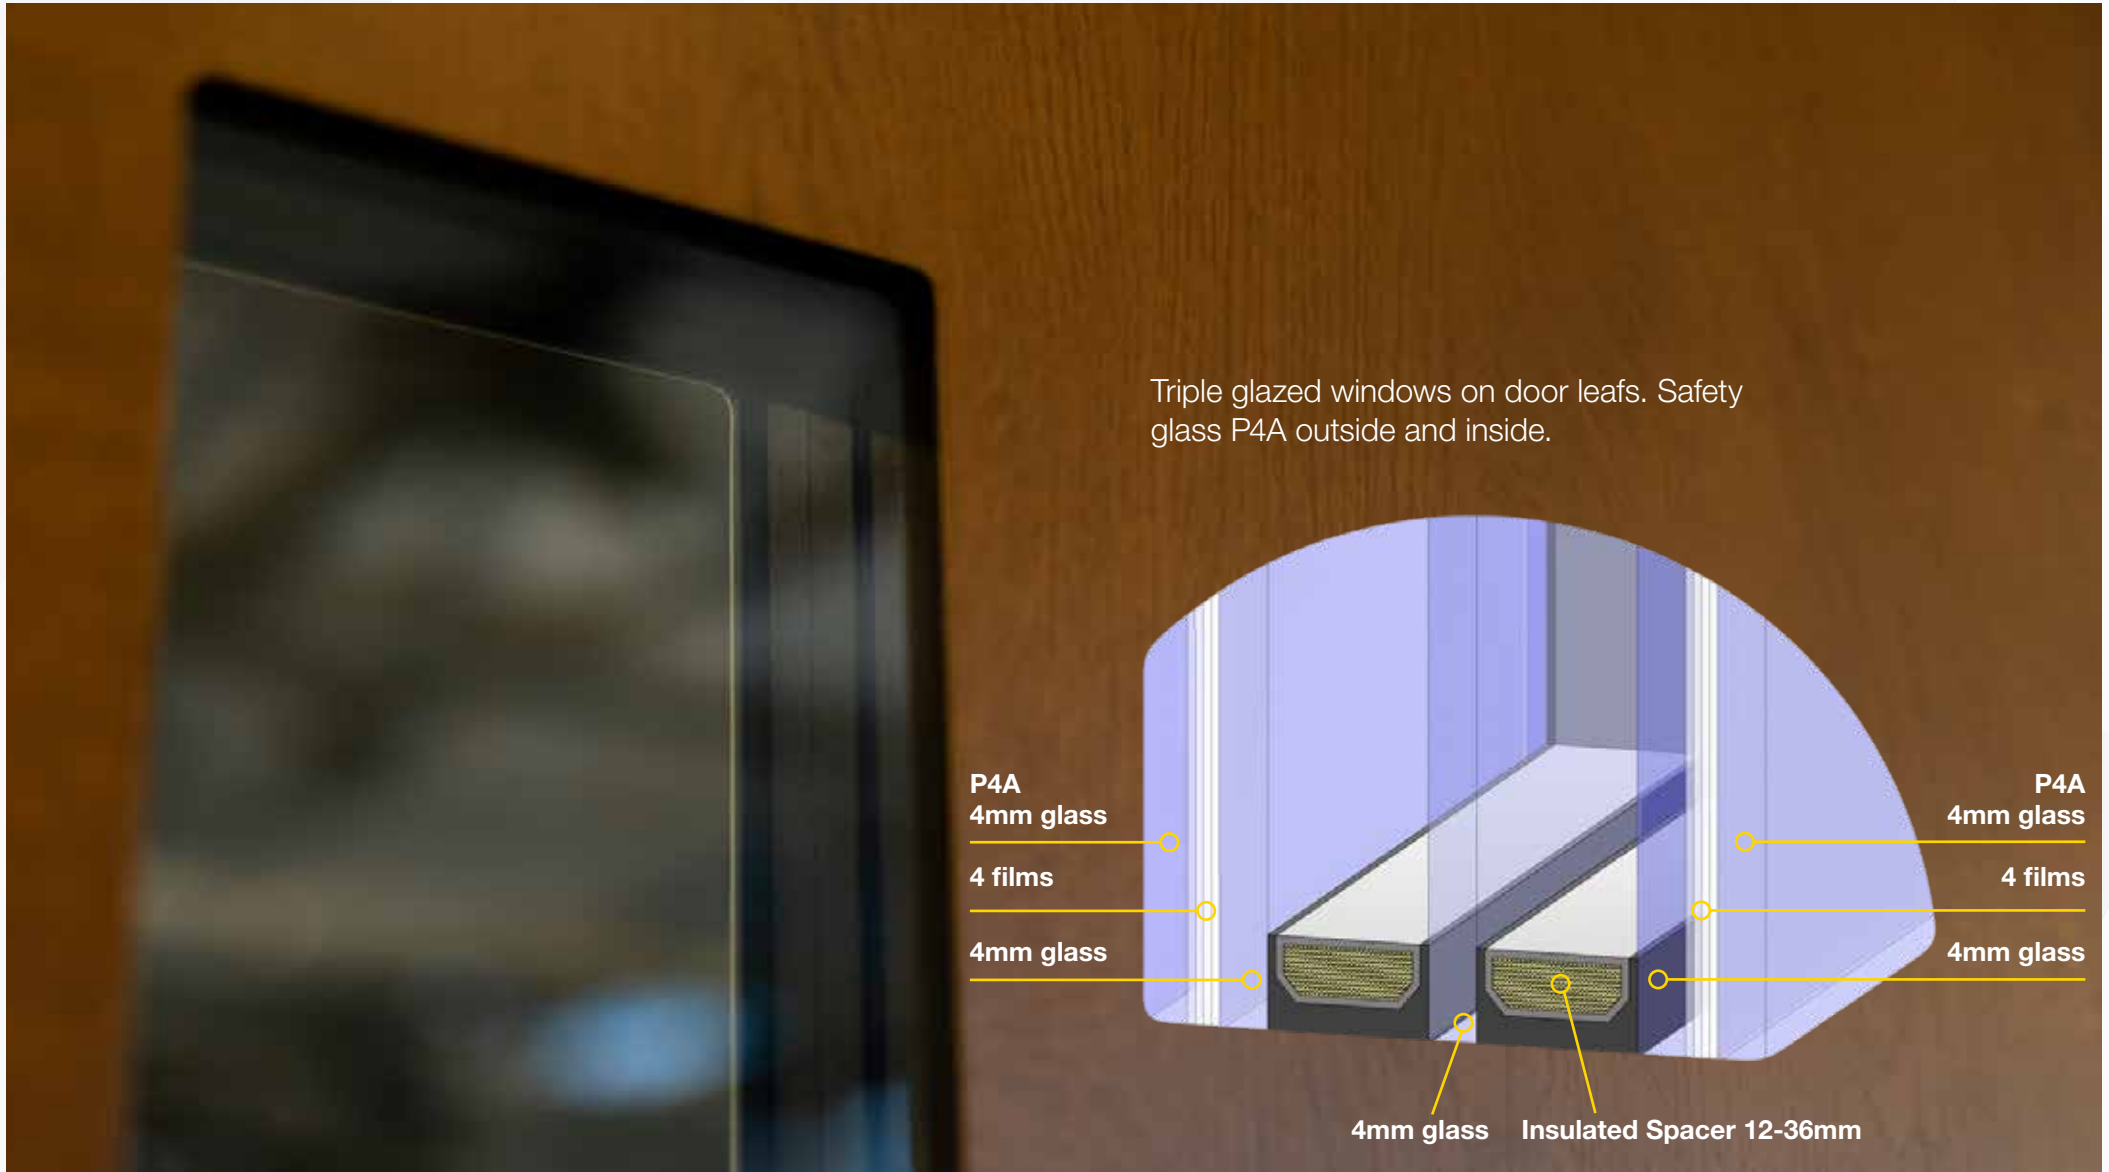

Threshold height is 12 mm on the inside and 22.5 mm on the outside.

Lock cylinders

CWA

CWA+TT

BCWA

BCWA+TT

WILKA lock cylinders are famous for their security and reliability. You can choose one of three safety classes: A, B or C the highest.

WILKA cylinder comes with 5 keys. Additional keys are available on request.

Finger scanners

FSC1 / FSC2 – eKey dLine fingerprint scanner. Can be installed flush with the door (FSC1) or on to door leaf (FSC2). Both finger scanners can be controlled by app. So you can open the door with your smart-phone and enjoy all the benefits of operation via app.

FSC3 – Sommer fingerprint scanner with biometric live-finger detection for secure door and gate opening. Stores 50–80 fingerprints (up to 9 administrators). Features encrypted 128-bit AES Rollingcode radio control for maximum security.

FSC4 – SIEGENIA SI-BUS access control system with fingerprint scanner. Direct SI-BUS installation without separate control unit, with Wi-Fi, Bluetooth and app control via the SIEGENIA Comfort app, plus encrypted access and remote user administration.

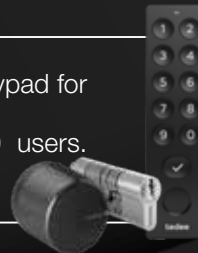

FSC5 – Flush-mounted Navkom Bioreader with integrated fingerprint scanner for secure and keyless access. Enables fast user recognition and convenient door control via app.

FSC6 – Advanced Navkom Bio-Touchpad combining fingerprint scanner and keypad in one unit. Provides flexible access via fingerprint, PIN code, or smartphone app control.

Navkom R8 – Enhanced remote access controller with integrated GSM module for door control via mobile network. Allows remote unlocking and management from virtually anywhere.

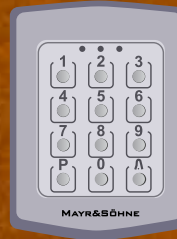

FSC7 – KEYPAD PRO – Biometric fingerprint scanner with PIN keypad for secure keyless entry. Unlock doors via fingerprint or PIN code, supports up to 100 users. Controlled via the *tedee* app. Suitable for outdoor installation.

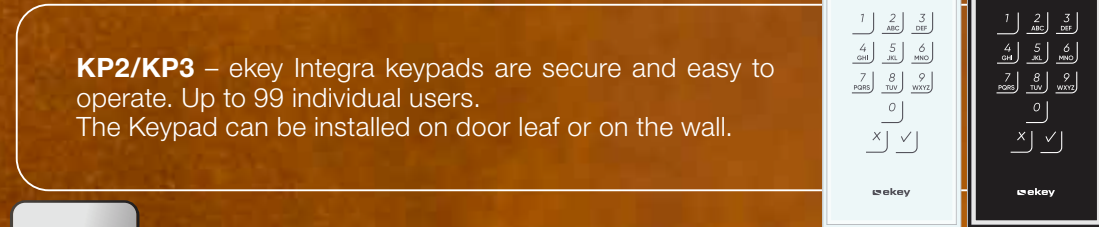

Only L3P+D&N+EM, L5PMA or L5PA locks are compatible with finger scanners.

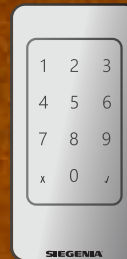

Keypads

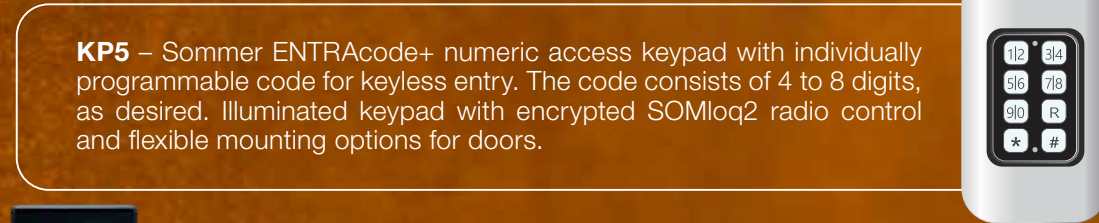

KP1 – The keypad for mounting on the wall. 3 different codes can operate 2 different relays.

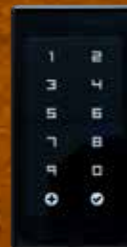

KP2/KP3 – ekey Integra keypads are secure and easy to operate. Up to 99 individual users. The Keypad can be installed on door leaf or on the wall.

KP4 – SIEGENIA keypad with SI-BUS technology. Direct installation without separate control unit. With WIFI and Bluetooth chip as standard. Administration of up to 200 users or 800 features. Control via the SIEGENIA Comfort app is possible.

KP5 – Sommer ENTRAcodE+ numeric access keypad with individually programmable code for keyless entry. The code consists of 4 to 8 digits, as desired. Illuminated keypad with encrypted SOMloq2 radio control and flexible mounting options for doors.

KP6 – Modern Navkom Touchpad with illuminated keypad for PIN-based access control. Allows easy user management and secure entry without a physical key.

Navkom R8 – Enhanced remote access controller with integrated GSM module for door control via mobile network. Allows remote unlocking and management from virtually anywhere.

Only L3P+D&N+EM, L5PMA or L5PA locks are compatible with keypads.

Locks

KFV locks are made from high-quality materials with precise workmanship. Hi-tech mechanics ensure reliable, precise and easy operation. Lots of options starting from the simplest 3 point lock up to sophisticated 5 point lock.

L3P - 3 points multiple lock. Main lock deadbolt and hook bolts operated by the key.

L5P - 5 points multiple lock. Two round latch bolts lock the leaf on closure automatically and opens by the key. Deadbolt and hook bolts operated by the key.

L3P+D&N - day & night. 3 point multi-point lock with option to temporary disable self-locking. Main deadbolt and hook bolts operated by the key.

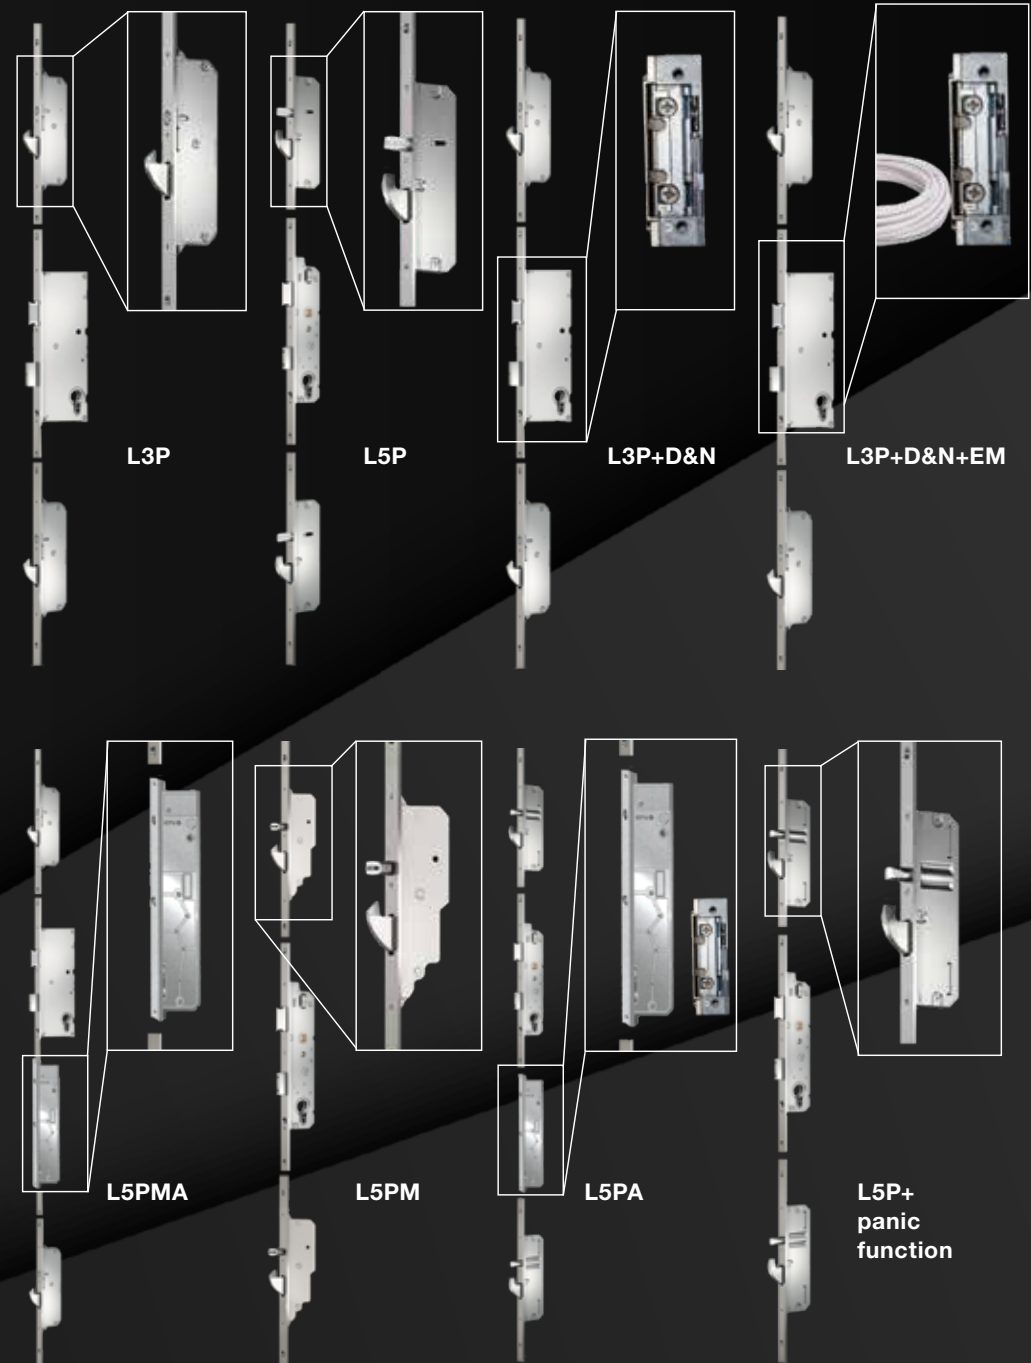

L3P+D&N+EM electric - 3 points multi-point lock with electric latch and option to temporary disable self-locking. Main lock deadbolt and hook bolts operated by the key.

L5PMA electric - L5PMA electric - 5 points multi-point lock. Round latch and hook bolts lock the leaf on closure automatically. Deadbolt operated by the key only. If deadbolt is engaged automatic unlocking is disabled. All latches open by electric drive when turning the key or pressing lever handle. Lock can be connected to finger-scanner or keypad (optional). Not compatible with lever handle from outside, pull handle only.

L5PM without electric motor - 5 point multi-point lock. Round latch and hook bolts lock the leaf on closure automatically. Deadbolt operated by the key only. Not compatible with lever handle from outside, pull handle only.

L5PA electric - 5 point multi-point lock with all latches and deadbolt operated by electric drive. Locks automatically when closing the door. All latches and deadbolt open by electric drive when turning the key or pressing lever handle. Not compatible with lever handle from outside, pull handle only. Lock can be connected to finger-scanner and keypad (optional). Electromagnetic strike included. Not available when overall frame height is less than 2035mm.

L5P + panic function electric - 5 points multi-point lock with all latches and deadbolt operated by electric drive. Locks automatically when closing the door. All latches and deadbolt open by electric drive when turning the key or pressing lever handle. Not compatible with lever handle from outside, pull handle only. Lock can be connected to finger-scanner and keypad (optional).

HAPPY YOU
HAPPY US

Door type RD80

The door frame is constructed from aluminium profiles including a thermal break to reduce thermal transference from the outer to inner skin. The door leaf is made from 2.5mm (outer) and 1.5mm (inner) aluminium sheets (some designs may differ).

The doors inner core, assembly profiles and frames are filled with a strong environmentally friendly freon free PU foam.

Triple all round perimeter rubber weather sealing completes a combination that gives Ryterna entrance doors the following performance values:

Types of frames

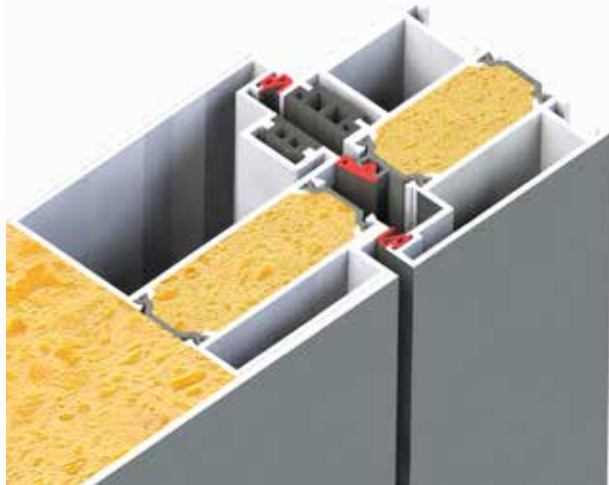

Flat

Jutted

Door leaf

Flush leaf with aluminium sheet skin.

Three contour sealing ensures perfect insulation.

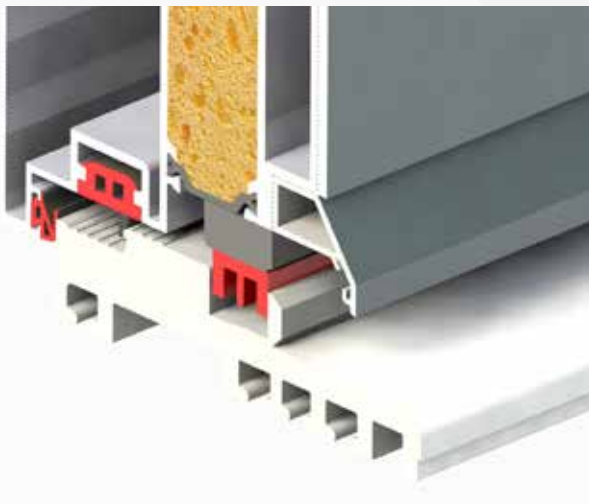

Door has three seal contours: one on the frame and two on the leaf.

Hinges

Depending on the design of the profile sections, the 3-piece hinges are able to support doors weighing up to 120 kg. These two series are fastened with the aid of self-drilling screws in the reinforcement of the frame profile with long pins to distribute the forces, acting on the hinge. It also leaves the seal untouched, thus ensuring maintenance of the maximum insulation values. It can be adjusted very conveniently and with little effort in three directions.

Magnetic threshold

The 'pop-up' magnetic strip is a high quality durable and maintenance free threshold system that significantly improves insulation and draughts. Two further rubbers ensure the best possible performance.

As the door closes a magnetic strip rises to create a perfect seal between the threshold and door.

As the door opens the strip gently drops back into its groove reducing the step.

Our magnetic threshold has been designed to reduce the obstacles met by wheelchairs, prams and other wheeled vehicles.

Concealed hinges

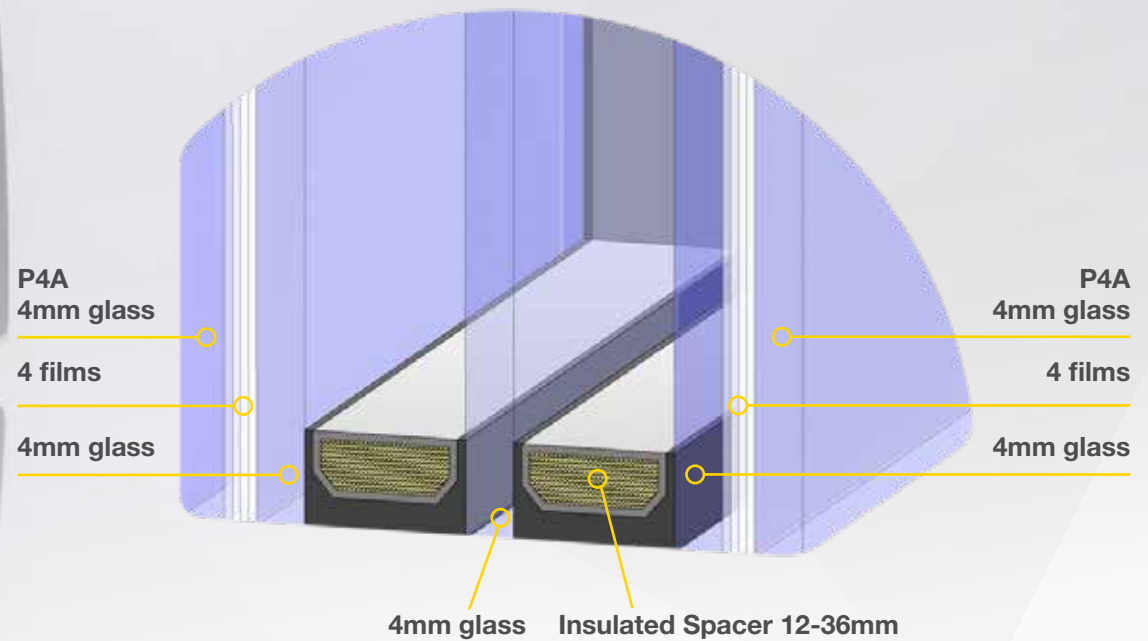

The Wala WU hidden hinge is a certified product with a capacity of 150 kg. It guarantees quick and easy assembly. Wala WU hinge provides smooth adjustments in three directions.

Concealed hinges are available with inside opening RD100 doors only.

Door leaf glazing

Triple glazed windows on door leaves. Safety glass P4A outside and inside.

Special slate-lite coating

Slate-Lite is a high-quality natural stone veneer that combines an authentic stone appearance with exceptional functionality.

Thanks to its fiberglass backing, the material is particularly durable and suitable for both interior and exterior use.

With a thickness of only approx. 1.5 mm and very low weight, Slate-Lite can be applied to almost any surface and even adapted to curved shapes.

For entrance doors, Slate-Lite offers a unique way to achieve an elegant and premium stone look – without the weight and limitations of solid stone. Ideal for modern architecture and durable exterior design.

Finger scanners

FSC1 / FSC2 – eKey dLine fingerprint scanner. Can be installed flush with the door (FSC1) or on to door leaf (FSC2). Both finger scanners can be controlled by app. So you can open the door with your smart-phone and enjoy all the benefits of operation via app.

FSC3 – Sommer fingerprint scanner with biometric live-finger detection for secure door and gate opening. Stores 50–80 fingerprints (up to 9 administrators). Features encrypted 128-bit AES Rollingcode radio control for maximum security.

FSC4 – SIEGENIA SI-BUS access control system with fingerprint scanner. Direct SI-BUS installation without separate control unit, with Wi-Fi, Bluetooth and app control via the SIEGENIA Comfort app, plus encrypted access and remote user administration.

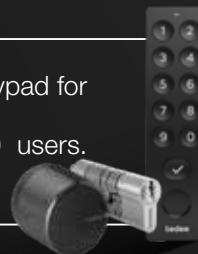

FSC5 – Flush-mounted Navkom Bioreader with integrated fingerprint scanner for secure and keyless access. Enables fast user recognition and convenient door control via app.

FSC6 – Advanced Navkom Bio-Touchpad combining fingerprint scanner and keypad in one unit. Provides flexible access via fingerprint, PIN code, or smartphone app control.

Navkom R8 – Enhanced remote access controller with integrated GSM module for door control via mobile network. Allows remote unlocking and management from virtually anywhere.

FSC7 – KEYPAD PRO – Biometric fingerprint scanner with PIN keypad for secure keyless entry. Unlock doors via fingerprint or PIN code, supports up to 100 users. Controlled via the *tedee* app. Suitable for outdoor installation.

Only L3P+D&N+EM, L5PMA or L5PA locks are compatible with finger scanners.

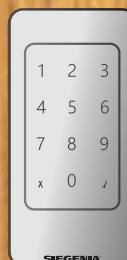

Keypads

KP1 – The keypad for mounting on the wall. 3 different codes can operate 2 different relays.

KP2/KP3 – ekey Integra keypads are secure and easy to operate. Up to 99 individual users. The Keypad can be installed on door leaf or on the wall.

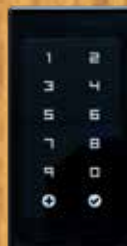

KP4 – SIEGENIA keypad with SI-BUS technology. Direct installation without separate control unit. With WIFI and Bluetooth chip as standard. Administration of up to 200 users or 800 features. Control via the SIEGENIA Comfort app is possible.

KP5 – Sommer ENTRAcodE+ numeric access keypad with individually programmable code for keyless entry. The code consists of 4 to 8 digits, as desired. Illuminated keypad with encrypted SOMloq2 radio control and flexible mounting options for doors.

KP6 – Modern Navkom Touchpad with illuminated keypad for PIN-based access control. Allows easy user management and secure entry without a physical key.

Navkom R8 – Enhanced remote access controller with integrated GSM module for door control via mobile network. Allows remote unlocking and management from virtually anywhere.

Only L3P+D&N+EM, L5PMA or L5PA locks are compatible with keypads.

Locks

KFV locks are made from high-quality materials with precise workmanship. Hi-tech mechanics ensure reliable, precise and easy operation. Lots of options starting from the simplest 3 point lock up to sophisticated 5 point lock.

L3P - 3 points multiple lock. Main lock deadbolt and hook bolts operated by the key.

L5P - 5 points multiple lock. Two round latch bolts lock the leaf on closure automatically and opens by the key. Deadbolt and hook bolts operated by the key.

L3P+D&N - day & night. 3 point multi-point lock with option to temporary disable self-locking. Main deadbolt and hook bolts operated by the key.

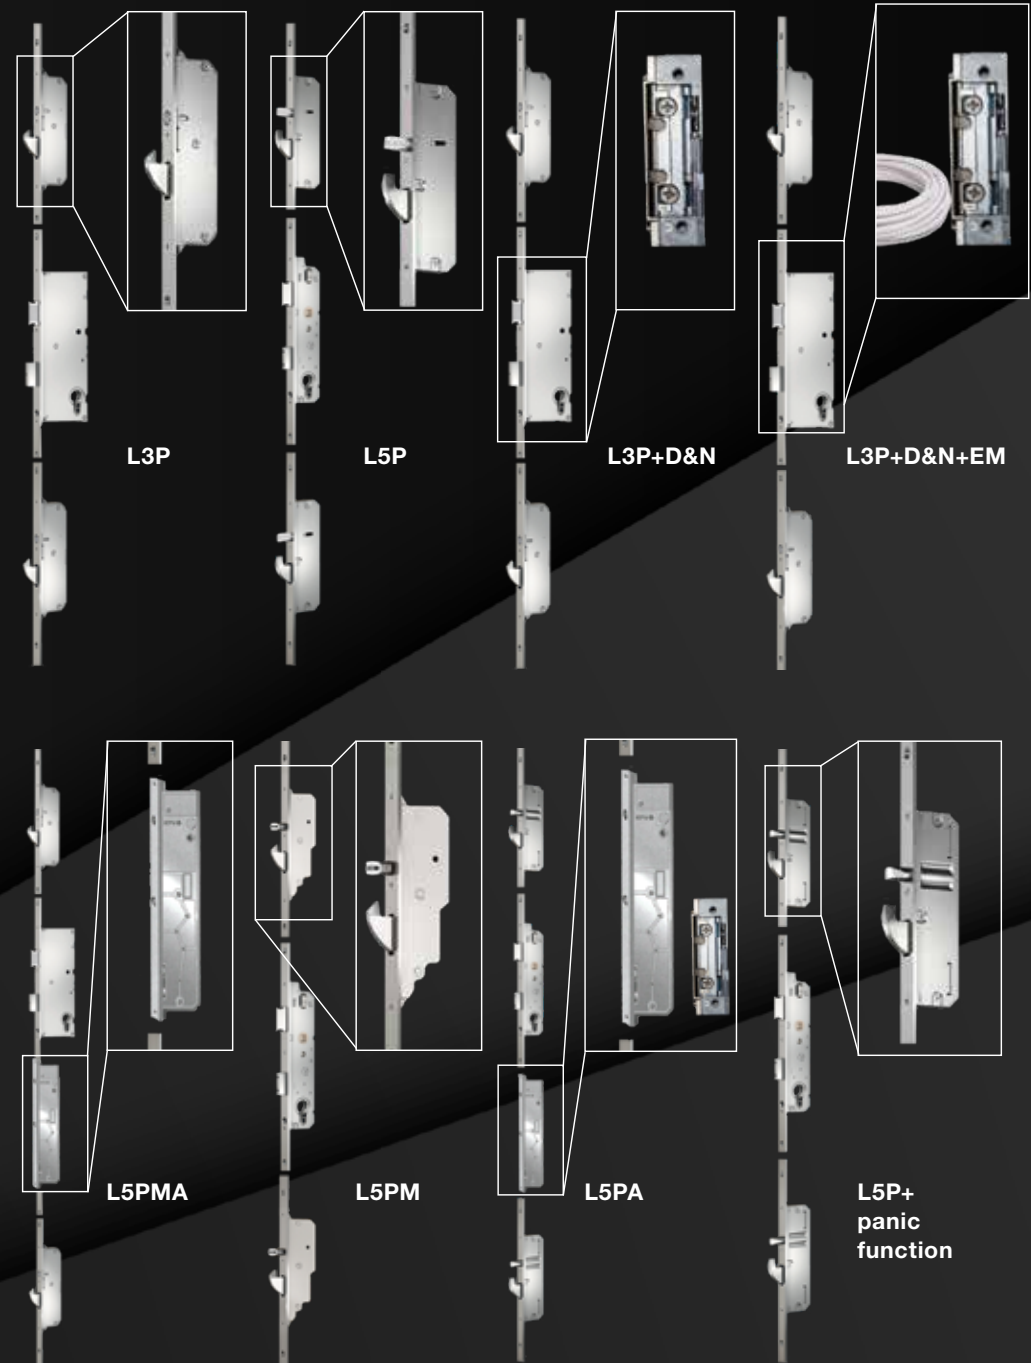

L3P+D&N+EM electric - 3 points multi-point lock with electric latch and option to temporary disable self-locking. Main lock deadbolt and hook bolts operated by the key.

L5PMA electric - L5PMA electric - 5 points multi-point lock. Round latch and hook bolts lock the leaf on closure automatically. Deadbolt operated by the key only. If deadbolt is engaged automatic unlocking is disabled. All latches open by electric drive when turning the key or pressing lever handle. Lock can be connected to finger-scanner or keypad (optional). Not compatible with lever handle from outside, pull handle only.

L5PM without electric motor - 5 point multi-point lock. Round latch and hook bolts lock the leaf on closure automatically. Deadbolt operated by the key only. Not compatible with lever handle from outside, pull handle only.

L5PA electric - 5 point multi-point lock with all latches and deadbolt operated by electric drive. Locks automatically when closing the door. All latches and deadbolt open by electric drive when turning the key or pressing lever handle. Not compatible with lever handle from outside, pull handle only. Lock can be connected to finger-scanner and keypad (optional). Electromagnetic strike included. Not available when overall frame height is less than 2035mm.

L5P + panic function electric - 5 points multi-point lock with all latches and deadbolt operated by electric drive. Locks automatically when closing the door. All latches and deadbolt open by electric drive when turning the key or pressing lever handle. Not compatible with lever handle from outside, pull handle only. Lock can be connected to finger-scanner and keypad (optional).

The image shows a modern, light-colored wooden door with a vertical glass insert. The glass insert features a decorative, geometric metal applique in the center. The door is set within a dark frame, and the surrounding building facade consists of horizontal wooden slats. The door is flanked by large windows, and there are green plants in the foreground and background. The overall aesthetic is clean and contemporary.
